Uijin Cho

San Francisco Bay Area, CA | (669) 236 – 7016 | uijin_cho@brown.edu | uijincho.com

EDUCATION

Brown University – *GPA: 4.0/4.0* **Providence, RI**
Sc.B. Computer Science & Applied Mathematics *Expected Graduation: May 2029*
- **Relevant Coursework**: Probability & Statistics, Principles of Economics, Management of Industrial & Nonprofit Organizations

Machine Learning Certificate, *Stanford University (Coursera)* *Earned August 2025*
- **Relevant Topics:** Regression, Classification, Clustering, Anomaly Detection, Neural Networks, Model Evaluation & Validation

West Valley College **Saratoga, CA**
Certificate of Achievement in Mathematics *Earned December 2024*
- **Relevant Coursework**: Object-Oriented Programming, Data Structures & Algorithms, Multivariable Calculus, Linear Algebra

SKILLS

Languages: Python, C/C++, Pyret, JavaScript, SQL, HTML/CSS
Frameworks & Libraries: Flask, ReactJS, Jekyll, Pygame, NumPy, Pandas, Matplotlib, OpenCV, TensorFlow
Tools & Technologies: Git/GitHub, GitHub Pages, Node.js, Bash, Linux, Docker, Jira, Vercel
Professional & Leadership Affiliations: National Center for Women & Information Technology, Rewriting the Code

EXPERIENCE

GoDaddy **Tempe, AZ**
Incoming Software Engineer Intern *Summer 2026*

Brown Daily Herald **Providence, RI**
Data Analyst *January 2026 – Present*
- Collect and analyze campus & city-level datasets to uncover trends in student life, institutional operations, and local issues
- Build quantitative models, visualizations, and dashboards to support data journalism and news coverage across sections
- Translate complex datasets into accessible graphics and explanatory briefs for publication, supporting editorial decisions

Robolabs **San Jose, CA**
Engineer & Robotics Coach *March 2024 – August 2025*
- Engineered a PID system for VEX Robotics to enhance motor response precision and stability through real-time signal tuning
- Authored a modular open-source C++ curriculum deployed to 3K students, integrating algorithms and robotics fundamentals
- Instructed 50 students in robotics, mathematics, and programming, developing learning tracks individualized to each student

LEADERSHIP

Hack@Brown **Providence, RI**
Hackathon Co-Director *February 2026 – Present*
- Lead a multifunctional team of 40 students for the organization of Hack@Brown 2027, an event with 300 participants
- Created an initiative to launch the only collegiate-organized high school hackathon for Rhode Island students

Experience Organizer *August 2025 – February 2026*
- Lead participant analytics, using quantitative insights to optimize event logistics and enhance user satisfaction
- Established corporate partnerships with Ekotrope, Motional, MBTA, Jellyfish, and more through targeted outreach efforts

Blu's Hacks **San Jose, CA**
Hackathon Director *August 2023 – March 2025*
- Directed a large-scale student hackathon fostering innovation in design, entrepreneurship, and technical problem solving
- Negotiated $36K in sponsorships, securing partnerships with corporate and nonprofit stakeholders across the Bay Area
- Expanded participation by 25%, driving inclusive access to computational and quantitative skill development

PROJECTS

Monsoon & Air Quality Analysis in Seoul, SK | *Pandas, Matplotlib, Seaborn*
- Designed and executed quantitative study analyzing monsoon impacts on air quality in Seoul, South Korea, processing 30 years of hourly environmental measurements across 5 pollutants and precipitation data (54,750+ data points)
- Discovered 50.7% increase in cumulative pollutant exposure through identification of temporal shifts in pollutant peaks

Image to Lithophane STL Generator | *ReactJS, Javascript, Three.js*
- Built a browser-based pipeline converting images into 3D surface meshes using matrix analysis and computational geometry
- Reduced mesh generation time by 60% via spatial partitioning optimization, balancing efficiency and geometric fidelity
- Streamlined surface triangulation, decreasing vertex density by 35% while maintaining structural accuracy
